Subject: "Settlement" only in favour of microsoft

Instead of getting punished, you are allowing mircosoft to dump there monopoly software on all schools!

I am very very against this! IF there has to be a settlement (which I oppose to begin with) then demand that microsoft ONLY delivers the hardware and does NOT install software on it!!! I know that empty computers are not of much use to microsoft - so let RedHat put free software on it, as they generously offered (or any other NON-microsoft).

If the current, ridiculous, settlement passes - then you've been tricked by microsoft and they will be laughing off their asses behind your back :(
